

The Epsom Skin Clinic

Laser Liposuction

The revolutionary alternative to liposuction

Laser Liposuction is an innovative concept in laser assisted liposculpture, which targets areas of fat that are resistant to diet and exercise.

It is a minor procedure for body contouring which uses a fine cannula to deliver a safe, powerful laser to disrupt the fat cells causing them to break down. The fat deposits can then be removed using light suction. The Laser Liposuction treatment is performed under local anaesthetic, is permanent, safe and gives minimal downtime.

Advantages of Conventional Liposuction

- Laser Invasive
- Local Anaesthetic
- Long Downtime
- Laser Skin Tightening

RESULTS IN JUST 2 WEEKS

OVER 800 PROCEDURES PERFORMED

Before **After**

Doctor led laser and aesthetics in the heart of Epsom...
