SAFE NIGHT OUT

Going on a night out and having a few drinks can be a good laugh but things can go wrong if you get completely wasted. Alcohol and other drugs can make you lose control and arguing, fighting, throwing up, passing out, having unsafe sex and heading up somewhere strange doesn't feel so good the morning after.

SO IF YOU'RE OUT DRINKING - KEEP THINKING!!

RU Under 25?

Bad tackle!

b-safe and... b-sure

Untreated chlamydia can make you infertile.

You can get chlamydia through sexual activity and you can carry it with you for years. There are no obvious signs or symptoms of chlamydia. What's more it can also speed up the early onset of arthritis in your joints.

Chlamydia can be easily treated with free antibiotics.

So get yourself tested just to b-safe.

If you are under 25 you can order a free confidential testing kit online at: www.b-sure.org.uk or phone: 0845 602 0894

NHS

Free confidential chlamydia testing kits for under 25's

NHS Tees

Is it really worth having this test?

It's a good idea chlamydia could stop you having kids

Chlamydia is the most commonly diagnosed STI but most people who catch it don't get any symptoms. Say 'yes' to the test and find out if you've got it. Remember you won't be protected against STIs without a condom.

Testing kits will be available from staff toilets, please take one away today and send back using the stamped address envelope provided.

Or call the central office on 01642 266210 to request a test or visit www.havelgotit.org
